Josh Davidson

A 19-year-old teenager, who recently entered his first year of university life in Canada. He decided to attend the university near his hometown, so he could live with his family of five. He has always been a responsible brother who always takes care of his younger sister and brother while his parents are away from work. His parents work in a sales company which requires them to travel away occasionally.

Josh has been an athlete since elementary school. He always plays for the school basketball team. The basketball team is also the place where Josh and Jane have met. Jane is Josh's girlfriend; they have been together ever since grade 10. His first formal date with Jane was to invite Jane to watch a movie together. While at home, he likes to watch TV dramas and movies with his brother and sister in his leisure time. He likes the feeling of pulling the family together and to accomplish something. Sometimes, he would also invite Jane to come to his house and watch dramas together.

However, Josh and Jane must split up as Jane is moving away from her hometown to study in the US. Josh always missed the good times that they have spent together, especially the time that they both were watching the Game of Thrones together. They could always discuss the story, the character, and the lines together.

Jane Smith

Jane is now a 19-year-old teenager, who recently moved to the United State for college. She has always been a top student in her school. She also got a full scholarship from the University that she has been dreaming of. It is the same university that her father went to, who was a great architect. Unfortunately, her father passed away due to a car accident when Jane was 16. She became the high school coach's assistant only because she wants herself to get busy in order to not think of her father. When Jane got the admission letter from the University, her mother also decided to move to the US with Jane.

Jane has been a fan of an exquisite dollhouses since her childhood. She loves to build those dollhouses with her father. While Jane was dating Josh, she likes Josh being the accountable person in her life. Jane wasn't into watching TV series so much, but Josh loved it and she also likes the feeling of home that Josh has brought to her. She only begins to love watching drama when John first introduces her to watch Game of Throne which is her favorite. Jane has been feeling lonely after moving to the US, and wants the company of Josh to make her feel less alone.

Jane met Josh on a school field trip, at the time she hasn't been recovered from the sadness of losing her loved one. Jane was trying to walk across the street, but she was almost got hit by a car. Luckily, Josh pulled him back.

John Doe

John Doe is a 24-year-old software engineer working at a large technology company. He married his wife 3 years ago and they have a 7-month old child. He was recently hired, and he is a motivated, kind, hard working person. He works in a department of 5. Because of his hard working attitude and his motivation to get better, he graduated university with a 4.0 cGPA with an extensive collection of side projects. He is an avid fan of all things related to technology and loves to learn new things.

John met Joey, who is a coworker in his department. Joey is also 24 years old. Despite going to the same workplace, Joey lives in Ajax while John lives in Oakville, and the 2 cities are 82km apart from each other. This makes meeting up after work almost impossible. Joey is also a big fan of technology. However, Joey does not possess a lot of knowledge in regards to technology because he did not study Computer Science or Computer Engineering in university. Even though he lacks knowledge, he does not lack the passion to learn new things.

John is a kind person, which is why he wants to help Joey learn new technologies. However, since they live so far apart and John has a very young kid, they can not meet after work because John must go home immediately after work to take care of his child. He always takes the GO train home at 5:30PM every day. He tried using Discord to talk to Joey, but it's difficult to see exactly where Joey is because they're not watching the tutorial together. He thinks that it would be great if he could meet with his coworker to teach him TensorFlow while also being able to see his progress and explain confusing concepts to him along the way.
